Doctoral Programme in Arts and Humanities

Programme description

The Doctoral Programme in Arts and Humanities at the University of Cadiz aims to train PhD students in the various fields of historical, philological, philosophical, cultural and gender studies, by fostering through interdisciplinary research further insight into human development from its roots in the old days to current globalisation.

Given its seven specific strategic research areas with a solid foundation in the generic field of Arts and Humanities at the University of Cadiz, the Programme distinguishes itself from similar academic offers and provides the humanities master's degrees with the scope necessary on third cycle programmes.

Qualifications required

Graduate students and master's graduates, holders of a Bachelor's degree who have a Master of Advanced Studies and doctors in any discipline of Arts and the Humanities from the Spanish education system or overseas. Given its interdisciplinary nature, graduate students from other disciplines can also enter the programme. Entry is subject to the Academic Advisory Committee which may require students to attain competence in specific training areas relevant to the Programme.

Research areas

1. Philosophy, democracy and identity
2. Genre, identity and citizenship
3. Enlightenment, Liberalism, Romanticism and Democracy (XVIII-XXI century)
4. Study and critical edition of Latin Humanistic texts. Study and critical edition of Greek texts belonging to the Hellenistic and Imperial periods
5. Post-colonial and cultural studies
6. Spanish language and North African languages and cultures: language, history and teaching
7. Globalisation and modernisation processes in the Contemporary world

Doctoral Programme in Social Sciences and Law

Programme description

The UCA Doctoral Programme in Social Sciences and Law aims to help graduate students from law, economy and social sciences to complete their postgraduate education by offering training in the field of research.

Boasting eight research areas, the Programme brought together the effort, specialties and approaches of the University's various disciplines, research teams and researchers working in the scientific areas of Law, Economy and Business (Economy, Business Management, Financial Economy and Accounting) and Social Sciences.

Qualifications required

Graduate students holding a master's degree in Economy, Law or Social Sciences, which guarantees the necessary background knowledge and skills that enable students to successfully do the Programme and produce a doctoral thesis in their specialties.

Research areas

Law:

1. Penal System and Security
2. Public Administration, civil liberties and sectorial policies
3. Private law

Economy and Business:

4. Business and organizational management: strategies and human resources
5. Applied economy: territorial development and technological change
6. Information and monitoring systems in organizations

Educational Psychology:

7. Education and teacher training
8. Evaluation and innovation in organizations and educational settings
